

standard radio is nothing but garbage, they monopolize the industry by playing what they want, not listening to the people. ie Clear Channel, who consistently changeing formats and to the dismay of the fans it's all about thier numbers. personally sat radio is the way to go and because they listen to they subs they keep improving. With the amount of truckers on the road its better for them now they can prep themselves quicker knowing that the traffic is always available not just in the mornings and afternoons. C.Damon
